

Customer Questionnaire for Lead and Copper Testing of Drinking Water

Calmar Water Supply is required to do Lead and Copper testing at least every three years at different locations within our distribution system. In order to compile a database of the materials used in our customer's service lines and plumbing required by our sampling plan, please take a few minutes to complete this questionnaire and return to:

City of Calmar
P.O. Box 268
Calmar, IA 52132
Or
City of Calmar Drop Box

We thank you for your cooperation in helping us with this to continue to serve clean and safe drinking water to our customers.

Contact Information

Name of Person filling out this questionnaire: _____

Phone Number should we have questions: _____

Property Information

Address (use separate sheet for each property): _____

Type: Single Family Multi-Family Commercial Industrial

Year Built: Before 1988 After 1988

Water Service Components

USE THIS TEMPLATE TO ANSWER QUESTIONS ON BACK OF SHEET.

Service line material is either galvanized steel, lead, copper or plastic. You can perform some tests on the private side of your service line to determine the material. One test is the scratch test. By scratching the private side of your service line with a quarter, you will be able to determine the material. You can also perform the magnet test by attempting to stick a magnet to the line. Read on to find out how to conduct these tests:

Lead lines will be shiny when scratched with a quarter. A magnet WILL NOT stick to the pipe. Galvanized steel lines will be dull gray in color when scratched with a quarter. A magnet WILL stick to the pipe. Copper pipes will be shiny and bronze in color when scratched with a quarter. A magnet WILL NOT stick to the pipe.

Materials List

1. What material is your service line (1) made of? (Check all that apply)
 - Lead
 - Copper
 - Galvanized steel
 - P.E. (polyethylene)
2. When was the service line going into your house or business installed?
 - Before 1988
 - After 1988
3. What material are the pipes in your house or business made of (2)? (Check all that apply)
 - Lead
 - Copper
 - Galvanized
 - PVC
 - PEX
4. How old are the pipes inside your house?
 - Installed before 1988
 - Installed after 1988
5. Do you have a water softener or a whole home water purification system or any other treatment device installed in your house or business?
 - Yes
 - No
6. If you answered yes to question 5, do you have an untreated, cold water kitchen or bathroom faucet?
 - Yes
 - No
7. If your home or business meets the criteria for lead and copper sampling, would you be willing to participate in this testing? During testing, a Water Supply Employee would bring an empty bottle to your house, provide you with documentation and instructions on collecting the sample, and pick it up the next morning. Sampling frequency is typically every three years.
 - Yes
 - No

Thank you for participating in this survey; the data collected will allow us to provide accurate sampling and test results to determine the level of lead and copper found in our homes and businesses and to make appropriate treatment changes to lower or eliminate lead or copper leaching from service lines, plumbing, and fixtures in our customers' homes and businesses.

If you have any questions about this survey, please contact:
